

All new look, same great protection

Ring Alarm provides the same great DIY, whole-home protection in an all-new look. A more intuitive keypad with emergency buttons and smaller contact sensors that seamlessly blend into your home makes this our most accessible system yet.

Perfect for 1-2 bedroom homes

This kit comes with a base station to keep your system online, a keypad for in-home control, and a range extender to ensure your Alarm devices have signal. When paired with contact sensors to cover four doors or windows and a motion detector to cover a room, it's a great fit for 1-2 bedroom homes.

Complete control from the Ring app

Create a Ring of Security with the Ring app. Receive notifications when someone triggers the motion sensors, opens a window or door, or sets off the alarm. Arm, disarm, and set your Alarm in home mode with a tap and monitor all your connected Ring devices from one simple dashboard.

Control your security with three modes

Place your Ring Alarm in Home mode to disarm your interior sensors, while keeping your exterior sensors armed. Set to Away mode to arm all the sensors in your home to know what happens while you're out. And Disarm your system to disarm all sensors and freely walk in and out of your home.

Do it all yourself

Easily setup your Ring Alarm system in minutes. Everything you need comes in the box and no tools are required. Simply plug-in the Ring Alarm base station, activate your system via the Ring app, and place the contact sensors and motion detectors in your desired location. Now you're ready to protect!

Protection for your whole home

To enhance your connected, whole-home security system, add smart accessories (sold separately) to your Ring Alarm, such as sensors that detect fire, carbon monoxide, flood, and freeze and panic buttons to quickly request help.

Professional monitoring with Ring Protect Plus

Get 24/7 professional monitoring to help you reach emergency services and to enable cellular backup and 60 days unlimited video recording and photo capture for your Ring cameras and doorbells for \$10/month with Ring Protect Plus. Enable the plan after your free 30-day trial and cancel at any time.

Works with Alexa

Connect Ring Alarm to select Alexa-enabled devices to easily set your Alarm in home, away, and disarm modes and check the status of your security system with hands-free voice control. And when paired with Alexa Guard, you can set Guard to Away Mode to get Smart Alerts sent to your phone if your Echo device detects the sound of smoke alarms, carbon monoxide alarms, or glass breaking when you're away.
