

Nitro Concepts S300 EX Gaming Chair

With the S300-EX series, Nitro Concepts presents an impressive gaming chair that combines optimal ergonomics with extravagant racing look in bright colors. In times of RGB-lit computer hardware or finely tuned facilities, it is of course increasingly important to have the matching office chair, so that the overall picture can be perfected. The Nitro Concepts S300 EX is therefore the ideal office chair for lifestyle-conscious users who want to combine comfort with high ergonomics, functionality and a stylish design.

- Cover made of high-quality artificial leather in intensive colors
- Comfortable and breathable cold foam padding
- Long durability due to high material thickness
- Ergonomically individually adjustable
- Customizable 3D armrests, rocking mechanism & backrest
- Quiet 50mm castors for many surfaces
- Two comfortable pillows included
- Suitable for users up to 300 lbs
- Qualified as office chair according to DIN EN 1335

Exceptional Comfort Due to First-Class Upholstery & Frame Stability

The upholstery of the S300 series is made of open-pore and deformation-resistant cold foam, which has been specially optimised for durability by means of its superior density. The chair is therefore not only particularly breathable, but also ensures its capacity to maintain its shape over time. The typical appearance of a racing seat is retained, which is achieved by the sporty shell-style design.

To maintain the impressive design of the S300 series for as long as possible, a sturdy steel frame is used as the foundation for the outstanding upholstery. Additionally the gaming chair's premium materials ensure that noises such as squeaking or creaking and rapid wear and tear are a thing of the past. The combination of excellent German engineering skills and high-precision mechanical manufacturing allows a reliable and durable construction.

Luxurious adjustment possibilities

Once you're on the Nitro Concepts S300 gaming chair, you'll never want to leave the S300 EX again. The chair can be adjusted by 5" from 16" to 24" in height with the durable class 4 air lift. The integrated rocker function allows rocking by up to 14 degrees. In addition, the S300-EX series features an adjustable backrest and flexible 3D armrests.

To match this, Nitro Concepts also provides two comfortable and ergonomically supportive cushions for the neck and lumbar region. With such extensive customization options, ergonomic posture is no longer a problem!

The perfect position for every user

With the 3D armrests, Nitro Concepts stays with its proven concept. These are ideal for the sporty lifestyle approach of gaming chairs due to their high flexibility. They can be easily adjusted in three dimensions and thus become the perfect armrest for every user.

Anyone who would like to sit back while playing the game can not only use the rocking mechanism, but also adjust the backrest. With a 90-135-degree angle, you can sit back and relax, and even use the gaming chair for a quick nap on a charging screen.

Suitable for hard and soft floors

A durable nylon base also serves as the base for the S300 EX series. The five arms are accented with the matching accessory color and equipped with quiet castors. The 50mm wheels are made of a hard nylon core and a softer polyurethane coating. This makes them not only quiet, but also suitable for hard and soft floors.

The gaming chair is well equipped with the stable base and the gas pressure spring of security level 4 for a maximum load of up to 300 lbs.

Product information

Size: **PU Leather** | Color: **Urban Camo**
