

WiFi so good, you'll never think about it again.

### eero (2nd Generation)

The gateway of an eero system, eero (2nd generation) has two auto-detecting Ethernet ports that allow you to connect to your modem and any other device — like an Ethernet switch, printer, or another eero. With the addition of a second 5GHz radio, eero has tri-band power, which lets you do more, simultaneously, in every room of your home. eeros can either be the gateway or add 160 m<sup>2</sup> (1,750 sq. ft.) of coverage to any eero system. eero is wifi you never have to think about again.

### eero Beacon

Compact and powerful, eero Beacon is half the size of eero but comes with the same advanced wifi technology. Simply plug it into a wall outlet to add 140 m<sup>2</sup> (1,500 sq. ft.) of coverage. You can also add as many eero Beacons as you want. If there's an outlet, there's wifi. eero Beacon is also equipped with an LED nightlight. With an ambient light sensor and automatic dimmer, it intelligently adjusts brightness depending on the time of day. You can also choose to set your own brightness schedule using the eero app.

"eero's app was the easiest to understand, which made setting up and checking on the status of the Wi-Fi system extremely smooth...my favorite was eero."

**The New York Times**

#### Setup made simple

The app guides you through setup and placement. eeros automatically connect to create a wireless mesh network.

#### World-class security

eero adheres to the best standards in network security by issuing one-time passwords for eero app access and only allowing WPA2-compatible devices onto your network.

#### Entertainment-grade wifi

Stream, game, work, and play, from every corner of your home - and from the backyard, too. eero won't break a sweat.

#### Pause the internet

In a few taps, create profiles to set schedules and pause the internet on your kids' devices.

## Technical Details

<b>Dimensions</b>	eero: 4.76in (121mm) x 4.76in (121mm) x 1.26in (32mm)   eero Beacon: 4.76in (121mm) x 2.91in (74mm) x 1.18in (30mm)
<b>Wifi connectivity</b>	eero: Tri-band wifi radios, simultaneous 2.4GHz, 5.2GHz, and 5.8GHz wireless 2x2 MU-MIMO, beamforming, IEEE 802.11a/b/g/n/ac   eero Beacon: Dual-band wifi radios, simultaneous 2.4GHz and 5GHz wireless 2x2 MU-MIMO, beamforming, IEEE 802.11a/b/g/n/ac
<b>Wired connectivity</b>	eero: Dual auto-sensing Gigabit ports for WAN and/or LAN connectivity   eero Beacon: None
<b>Smart home connectivity</b>	Thread 1.1 Border Router, Bluetooth® LE 4.2
<b>Nightlight</b>	eero: None   eero Beacon: 10 Lumen LED nightlight, with automated dimming
<b>Electrical requirements</b>	100-240V AC, 50-60 Hz

<b>Required for setup</b>	Supported iOS or Android™ device, Internet service (with cable or DSL modem, if required). <a href="#">Click here to learn more.</a>
<b>Environmental requirements</b>	Operating: 0C - 35C; Storage: -25C - 60C; Relative Humidity Operating: 20%-90% non-condensing; Altitude Operating: 3000m
<b>Processor, memory and storage</b>	700 MHz quad-core processor, 512MB RAM, 4GB flash storage.
<b>Security and network services</b>	WPA2 encryption, Family Profiles, DHCP, IPV6, NAT, VPN Passthrough, UPnP, Static IP, and Port Forwarding.
<b>Warranty and service</b>	<a href="#">1-year limited warranty and service included.</a> Use of eero is subject to the terms found <a href="#">here.</a>
<b>Support</b>	<a href="#">Click here to view more information on the eero support page.</a>
<b>Generation</b>	eero Home wifi System 2nd Generation – 2017 release
